Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The frame house is a two story frame structure constructed in a L-shape plan. It has a four-bay by one-bay main section with a one-bay ell. The main facade is symmetrically arranged with entrances in the central two bays and a full-length, one-story porch. The exterior of the structure is covered in a asphalt siding. It has a gable roof covered in asphalt shingles. This structure appears to date from the late 19th century.

The property is located on the north side of Sandy Hook, approximately .16 mile east of Clark Road, in Sandy Hook. The site slopes gently away from the road. The main facade faces south.

The two story structure is constructed of frame covered in asphalt siding on a fieldstone foundation. The main facade is symmetrically arranged with the two central bays containing entrances. The entrances are spaced close together. Two-over-two sash windows with plain trim are in the outer bays of the first story. On the second, one-over-one sash windows are in the outer bays. The windows in the two central bays have been boarded over. The full length, one-story porch has a hipped roof and is supported on square posts with paneled railings. The porch is supported by a high brick foundation. The single bays on the gable ends have windows on each story. The second story windows contain six-over-six sash probably close in design to the original sash of the house. The one-bay wing has been remodeled and is presently covered in asphalt shingle. The gable roof has a boxed cornice. Rebuilt brick chimney stacks rise interior-end from each gable.
